

RONDA® ENVIRO-VAC

HV25 Power Take-off Vacuum Cleaner

Enviro-Vac H type vacuum cleaners are designed to meet all the needs and requirements for dealing with hazardous materials.

When an appliance such as a grinder is connected to the Take-off vacuum, the operation of the vacuum is then controlled via the switch on the appliance. There is also a built-in 10 second run-down on the vacuum ensuring that any debris in the hose is cleared.

They feature a 3-stage filtration system, ensuring safe and easy decontamination as well as giving the HEPA filters an extended life.

The vacuum cleaner has locking clips to avoid accidental opening and spread of contaminated material during transit or use.

They come with a low flow warning indicator.

The vacuum cleaner will form a valuable part of any system designed to control hazardous and health-endangering dust in the environment.

Voltage: 110V Product Code: N246

The vacuum cleaners conform to the standard **EN60335-2-69:2012.**

TECHNICAL DATA

Motor:	Single
110 Volt	11 Amps
Motor Power:	1000W
Air Flow:	170 m ³ /h
Suction power:	2794 mmH ₂ O
Noise level:	<86 dB
Collection capacity:	20 L
Filtration Class:	H14
Dimensions:	750mm x 400mm x 400mm
Weight:	12 kg
Material:	Polypropylene

- High efficiency 1000W motor
- 3-stage filtration system
- H14 HEPA filtration standard to 99.995%
- Low flow warning indicator
- Locking Clips
- Manufactured from tough Polypropylene Plastic
- Supplied with 38mm Toolkit
