

RONDA® ENVIRO-VAC

Model: Vacuum Airflow Tester

TECHNICAL DATA

Dimensions: 380mm x 510mm x 240mm
Weight: 5 kg
Material: Polypropylene

Enviro-Vac manufacture a Portable Vacuum Airflow Test Unit.

This will assist in monitoring and recording the current airflow through a type H vacuum cleaner.

It will be a valuable asset to any company who has vacuums as part of their operation.

Integral Flow transmitter and Probe.

The unit will provide an accurate indication as to whether the filtration system within the vacuum is blocked or becoming blocked.

Lightweight and portable.

Robust construction.

Simple operation.

Voltage: 110V / 240V Product Code: RE101
