

RONDA® ENVIRO-VAC

Duct Cleaning Air Mover 1000M3h Product codes: N240 110V 240V N267

E-VAC 1000 m³/h Duct Cleaner 240v N267

A versatile air mover, very popular with the ducting cleaning industry.

The upright ergonomic design makes installation and filter removal easy.

2 Stage Filtration, H13 & Bag Filter
All filtration is access via two clipped sections.
A built in manometer indicates when the filtration system is becoming blocked.

It is easily transported with lifting handles located near the bottom.

Lockable castors.

Constructed from tough polypropylene plastic, with strong seam welding throughout, it has been designed and manufactured for the UK and European dust removal market.

The Enviro-vac 1000 m³/h conforms to BS8520.

TECHNICAL DATA

110 Volt	2.8 Amps
240 Volt	1.2 Amps
Airflow (BS8520-2)	1200m ³ /h
Airflow (ISO5801)*	840 m ³ /h
Noise level:	< 70dB
Filtration Class:	H14
Dimensions:	H1100mm x W400mm x L500mm
Weight:	35kg
Material:	Polypropylene

*Based on the latest airflow measurement technology there are strong indications that the test method used by BS8520-2 annex A is resulting in an airflow reading which is 30-40% higher than the actual air flow. Both BSI and HSE are looking into this matter. In the meantime we strongly recommend that you base any calculations for your required air extraction on the air flow rates according to ISO 5801
