

RONDA® ENVIRO-VAC

Model: N257 LEV WELDING FUME SYSTEM 110v

RONDA® Enviro-Vac LEV Welding Fume System

The system has following features:

- H14 HEPA filtration
- A disposable pod, containing the H14 HEPA filter, filter bag and spark arrester
- Portable trolley designed with large casters to overcome obstacles.
- Camlock fitting outlet.
- 15m of inlet + outlet hose (50mm) included
- Flexible funnel nozzle with magnetic base included
- A visual low flow flashing amber beacon
- Audible low flow siren
- Lifting point (0.23 tonne max)
- Variable speed controlled
- Tamperproof bolts/padlock option to secure the pod
- Constructed from tough polypropylene plastic, with strong seam welding throughout
- 32 Amp Inlet Socket
- Flexible steel welding hose fitment.

TECHNICAL DATA

| | |
|-------------------|-------------------------|
| Motor: | Twin 1000W |
| 110 Volt | 21 Amps |
| Air flow: | 278 m ³ /h |
| Suction power: | 2794 mmH ₂ O |
| Noise level: | <86 dB |
| Collection cpty.: | 20 L |
| Filtration class: | H14 |
| Dimensions: | H700 x W350 x L390 mm |
| Weight: | 38 kg |
| Material: | Polypropylene |
| Lifting point: | 0.23 tonne |
